Fiddler

The screenshot displays the Fiddler Web Debugger interface. The main window shows a list of intercepted HTTP requests. The right-hand pane is divided into several sections: a top bar with tabs for FiddlerScript, Log, Filters, Timeline, and Willow; a section for composing a request with an 'Execute' button; a 'Parsed' tab showing the request details (GET http://www.example.com/ HTTP/1.1); a 'Request Body' section with an 'Upload file...' button; and a 'History' list on the right.
